I am a business teacher at Bishop Smith Catholic High School in Pembroke Ontario.

I am writing this letter in support of and in appreciation for the Enterprise Renfrew County organization. For several years Enterprise Renfrew County has provided secondary school business classes with the opportunity to enter a business plan competition and to actually use the plan through its Summer Company program. Some of my students have gained invaluable experience as a result of these programs. The mentoring programs associated with it have been particularly well received because they involve one on one assistance from experienced business people who work in the local community. A number of my students have also enrolled in a business program at the college or university level because of their experience with this organization..

My classes have attended a number of business/marketing education seminars sponsored by Enterprise Renfrew County over the years. These have been exceptionally well organized and have had excellent content.

Enterprise Renfrew County's other programs to assist small businesses have been a helpful resource for those people who wish to remain living in the county but are unable to find work unless they create their own ventures.

Yours  
Jack Rosien
